Sponsorships for the Continuing Challenge Tuition Grant Program

The Continuing Challenge Tuition Grant Program was developed to provide industry a vehicle to donate money to The Continuing Challenge Hazardous Material Workshop each year. All the money that is donated goes to students that meet The Continuing Challenge Tuition Grant Policy. The Continuing Challenge mission is to provide safe response training for all emergency responders to hazardous material incidents affecting public health and the environment.

The Tuition Grant Program allows more students to attend the workshop each year to continue their HazMat education, an education that not only teaches the student personal safety but also safety for their community and the environment around them. The Continuing Challenge Hazardous Materials Committee is asking for your support to help us provide the best hazardous materials training to as many students as possible. This is a chance for industry to play a major role in helping to train all First Responders that will respond to hazardous material incidents in their communities.

The Continuing Challenge is a 501c3, which makes all donations deductible. The committee has developed three levels of donations. Hopefully, one of the donation levels will fit your company's budget. Remember every dollar donated to The Continuing Challenge Tuition Grant Program will further the education of the First Responders in our communities. The donation levels are listed below:

Level 3	\$5,000.00 and up
Level 2	\$2,500.00 to 4,999.00
Level 1	\$1,000.00 to 2,499.00

If you have any questions, please contact our office at 916-433-1688 or info@hazmat.org.

Sincerely,
The Continuing Challenge Committee
